

FM-F086HF Flexible Coax Cable Blue FEP Jacket

FM-F086HF, by Fairview is a flexible, coaxial cable that provides similar loss characteristics to semi-rigid cable, low VSWR of 1.3:1 and a high frequency range up to 40 GHz. The low loss coax cable offers dual shields and silver-plated conductors to maintain a shielding effectiveness of 110 dB. Conductor sizing for this low VSWR coax was selected to allow attachment of standard connectors designed for M17/133-RG405 and other cables in the M17/133 family. The cable jacket provides a tough, chemical and heat resistant barrier. This FM-F086HF flexible low loss coaxial cable is a great option for short length, high frequency jumpers or system hook-up cable assemblies. In many instances, this Fairview coax cable can be used to replace bent semi-rigid cable assemblies and save the time and cost of bending.

Configuration:

- Flexible Cable
- 2 Shield(s)
