

HTCT-200 CT Ratio Polarity Tester

I. Introduction

HTCT-200 is very small, light, widely used and easy to carry.

II. Features

1. First company who use voltage measuring method, small in volume, light in weight, portable, meet the needs for field tests.
2. Voltage wave form generated by single chip process, clean and pure, without the interference by power network.
3. The internal of the device uses constant voltage source, with stable reading.
4. Applies to current transformers of tens ampere to tens thousands ampere and all electromagnetic PT.
5. Can directly display the transformer ratio.
6. Electron method to test the transformer polarity, simple and straightforward .

III. Parameters

Ratio measurement range	5A/5A~25000A/5A	5A/1A~5000A/1A
With CT, electromagnetic PT whole series		
Accuracy	0.2%	
Dimension	280x230x100mm3	
Weight	3kg	

IV. Accessories
