

ANALOG/DIGITAL SOLDER STATION

HIGH-SPEED SOLDERING

LED DIGITAL DISPLAYS TO SHOW PRECISION TEMPERATURE

HEAT INSULATION TREATMENT OF SOLDERING HANDLE

HANDLE IRON STAND

Features

1. Using a trinity digital display for precise temperature adjustment, and temperature increase or decrease based on 1°C
2. High power transformer ensure fast temperature compensation
3. Temperature calibration is made by inputting the calibration value the button

Specification

	YCD-936A	YCD-936D
Output Power	60W	
Input Voltage	AC 110V/220V 50/60Hz	
Handle Operating Voltage	AC24V	AC24/9V
Temperature Adjust Mode	Rotary	Push Button
Heating Element	YCD-1321	
Temperature Range	200-480°C	180-450°C
Temperature Stability	±3°C	±1°C
Nozzle to Ground Resistance	<2Ω	
Welding Nozzle to Ground Voltage	<2mv	
Product Weight	1.9KG	
Product Size	13.5*11*8cm
