

## **EUROSTAR 40 digital**

/// Data Sheet

Universal laboratory stirrer designed for simple stirring tasks for quantities up to 25 I (H2O). It automatically adjusts the speed through microprocessor controlled technology within the speed range of 0/30 - 2000 rpm. Safety circuits installed ensures automatic cut-off in an anti-stall or overload conditions. Continuous comparison of shaft speed to desired speed is maintained and variations are adjusted automatically. This guarantees a constant speed even with changes in viscosities of the sample.

- Digital speed display

- Infinitely adjustable speed

IKAworldwide /// #lookattheblue

- Push-through agitator shafts
- Overload protection
- Short-term overload operation
- Slim casing
- Quiet operation
- Error code display

## **Technical Data**

| Stirring quantity max. per stirring position (H2O) [I] | 25                                       |
|--|--|
| Motor rating input [W]                                 | 118                                      |
| Motor rating output [W]                                | 84                                       |
| Motor principle  | Brushless DC                             |
| Speed display  | 7 segment LED                            |
| Speed range [rpm]                                      | 0/30 - 2000                              |
| Viscosity max. [mPas]                                  | 30000                                    |
| Output max. at stirring shaft [W]                      | 84                                       |
| Permissible ON time [%]                                | 100                                      |
| Torque max. at stirring shaft [Ncm]                    | 40                                       |
| Speed control  | stepless                                 |
| Setting accuracy speed [±rpm]                          | 1  |
| Deviation of speed measurement n > 300rpm [±%]         | 1  |
| Deviation of speed measurement n < 300rpm [±rpm]       | 3  |
| Stirring element fastening                             | chuck                                    |
| Chuck range diameter [mm]                              | 0.5 - 10                                 |
| Hollow shaft, inner diameter [mm]                      | 11                                       |
| Hollow shaft (push-through - when stopped)             | yes                                      |
| Fastening on stand                                     | extension arm                            |
| Extension arm diameter [mm]                            | 16                                       |
| Extension arm length [mm]                              | 220                                      |
| Speed control  | electronic                               |
| Nominal torque [Nm]                                    | 0.4                                      |
| housing material                                       | alu-cast coating / thermoplastic polymer |
| Dimensions (W x H x D) [mm]                            | 86 x 248 x 208                           |
| Weight [kg]  | 4.4                                      |
| Permissible ambient temperature [°C]                   | 5 - 40                                   |
| Permissible relative humidity [%]                      | 80                                       |
| Protection class according to DIN EN 60529             | IP 42                                    |
| Voltage [V]  | 230 / 115 / 100                          |
| Frequency [Hz]   | 50/60                                    |
| Power input [W]  | 118                                      |
