

# QC-101M1 Carton Compression Tester

## Standard

---

## Description

---

Applied in common corrugated carton or other package container made by other materials as whole carton compression strength test. To prevent package carton strength is not enough during transport, stack, stock and moving that cause product deformation, damage of these kinds of inappropriate conditions happen. QC-101M1 can show test Max. Strength on simple control panel and also can select software and pc connection to control machine to proceed with various tests and analysis, it also can show test force and displacement diagram simultaneously during test.

## Appearance

---

## Specification

---

Capacity	2000 kg/ 5000 kg
Test speed	1 ~ 300mm/min
Hardware safety protection	Up/down limit, emergency stop button protection
Motor	Servo motor
Feature	Upper compression platen with universal design matching with testing subjects that automatically adjust flat surface
PC-port	TCP/IP
Power	Single phase 200 ~ 240VAC, 5A
capacity	2000 kg/ 5000 kg
PC-port	TCP/IP
