90±5mm/min Furniture Testing Machine Mattress Hardness Tester 500mm diameter 355mm

Introduction of product:

This tester is used for testing the softness and hardness of spring mattress and evaluating the hardness level. It can be used with durability test for the surface of mattress and durability test for the edge. Evaluate the test data before and after the test.

Put the mattress on the platform of the test, using loading plate to load to the parts of test.

Record the curve of loading process and evaluate the value of hardness according to relevant test data.

It is made of aluminum, generous and beautiful.

Control system adopts special high precision and high intelligence ARAM controller.

It can be run under WINDOWS system with special test software.

The software interface is clear and easy to be operated.

Technical parameters:

Loading plate: diameter 355mm,
