

Wood Moisture Meter TNJ-036

Detailed Description

Applied on determination of the moisture content of : wood, woodiness fiber materials such as bamboo, wood, Chinese traditional medicine, tobacco, cotton, paper, chemical raw materials. Building materials, oil products, non conductive material

The instrument measuring range more widely, fast operation, high accuracy, digital display, small size, easy to carry, with a calibrator.

Specifications:

Can measure 150 types wood, building materials

Measurement range: moisture 0~80%

Building moisture 0~50%

Accuracy: $\pm(0.5\%n+1)$

Resolution: 0.1

Power: 4 pcs 7-batteries

Dimension: 165*62*26mm

Weight: 334g(not include batteries)

RS232C connector
