PRODUCT DETAILS PRODUCT VIDEO

1. Application and Feature of Grinding-Polishing Machine

The grinding-polishing machine is a double-disc desktop, applicable to rough grinding, accurate grinding and polishing of metallographic sample. The machine has microprocessor control system, with a speed of 50-600rpm, thus widening its application. The machine is an indispensable equipment in making the metallographic sample. The machine has a cooling device to cool the sample during grinding and polishing, thus preventing the damage of the metallographic structure caused by overheat of the sample. The machine, easy to use, safe and reliable, is an ideal preparation equipment for the labs of plants, research institutes and universities and colleges etc..

2. Main Specifications:

Model	MOPAO-260E
Grinding/Polishing Disc Diameter	203mm /250mm
Rotate speed	50-600rpm (stepless speed) 150rpm 300rpm(two steps stationary speed)
Grinding/polishing disc direction	Clockwise or anticlockwise
Grinding/Polishing disc quantity	2
Motor	550W
Operating voltage	AC 220V 50HZ
Dimension	725×710×310mm
Weight	50kg
